+91 6202752128 | 17vsvaibhav@gmail.com | Bhubaneswar , Odisha | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

B.Tech CSE student with hands-on experience in SQL, Python, Excel, and Power BI, building end-to-end analytics projects in data cleaning, EDA, KPI reporting, visualization, and business insights. Passionate about transforming data into actionable insights and solving real-world business problems.

Domain/Functional Areas

- Data Analytics | Business Intelligence | Data Visualization

Key Skills

Programming & Querying: Python, SQL, Pandas, NumPy

Data Visualization & BI: Microsoft Excel, Power BI, DAX, Data Visualization, Dashboarding

Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Data Transformation, KPI Analysis, Business Insights

Projects

E-commerce Sales Analytics Using SQL - Data Analytics [Project Link](#)

[SQL | Data Cleaning & Analysis | Joins | Subqueries | CTEs | Window Functions | Aggregations] Jul 2026 - Aug 2026

- Analyzed 100,000+ e-commerce orders across customer, order, product, seller, payment, and regional data using a relational database.
- Designed and analyzed a 7-table relational schema using primary and foreign-key relationships for multi-table business analysis.
- Developed advanced SQL queries using CTEs, window functions, subqueries, joins, CASE statements, date functions, and ranking.
- Evaluated sales, customer, seller/product, payment, regional, order-status, and KPI trends to generate actionable business insights.

Sales Data Analytics Using Python - Data Analytics [Project Link](#)

[Python | Pandas | NumPy | Data Cleaning | Exploratory Data Analysis | Data Visualization] May 2026 - Jun 2026

- Analyzed 10,000+ retail sales records from the Sample Superstore dataset to evaluate sales, profitability, customer, product, and regional performance.
- Performed data cleaning, validation, missing-value and duplicate analysis, and EDA using Pandas and NumPy.
- Created visual analyses covering category/sub-category performance, regional sales and profitability, discount impact, sales distribution, and correlations.
- Generated business recommendations around pricing, discount optimization, inventory planning, and category/region performance.

Excel Business Analytics & Financial Reporting - Data Analytics [Project Link](#)

[Microsoft Excel | Data Cleaning | Data Visualization | Dashboarding | KPI Analysis | Financial Reporting] Mar 2026 - Apr 2026

- Built executive-level reports covering customer performance, market performance vs. targets, and financial performance across multiple business dimensions.
- Performed customer and market analysis using YoY growth, variance analysis, target achievement, and KPI reporting.
- Developed P&L reports across fiscal years, markets, and months using Net Sales, COGS, Gross Margin, and Gross Margin %.
- Applied Power Query, Power Pivot, DAX, Pivot Tables, and data modeling to transform business data into decision-support reports.
